

DANIEL PEREZ

SENIOR SOFTWARE ENGINEER

Austin, TX, 78754 (512) 881-0688 danielxperez9119@outlook.com linkedin.com/in/danielperez4527

PROFESSIONAL SUMMARY

*Accomplished Senior Software Engineer with expertise in **Python3, Java, Rust**, and a strong focus on **performance optimization, codebase refactoring, and feature implementation**. Demonstrated ability to drive collaboration in cross-functional teams and enhance AI systems with precise, real-world coding expertise. Skilled in delivering maintainable, scalable solutions in distributed remote environments.*

TECHNICAL SKILLS

- Programming Languages: Python3, Java, Rust, Go, TypeScript, C++
- Software Development: Performance optimization, Feature development, Codebase refactoring, Debugging complex software issues, Scalable software solutions
- Technical Expertise: Algorithms, Data structures, Distributed systems, System architecture evaluation, Software maintainability
- Collaboration: Cross-functional team collaboration, Code reviews, Technical communication, Best practices documentation, AI system feedback
- Tools and Platforms: CI/CD tools, Version control systems, Proprietary AI platforms, Development frameworks, Cloud computing platforms

PROFESSIONAL EXPERIENCE

GITHUB

May 2017 – May 2026

Senior Software Engineer

- ▶ Led the **design and development of high-performance features** for a global source code hosting platform, integrating **Python3, Java**, and **Rust** to enhance version control and **collaboration tools**.
- ▶ Executed **codebase refactoring and performance optimization**, ensuring maintainable and **scalable software solutions** to support millions of developers worldwide.
- ▶ Applied expertise in **algorithms, data structures**, and **distributed systems** to debug complex issues, delivering robust solutions in enterprise and open-source environments.
- ▶ Optimized CI/CD automation pipelines with **Go** and **TypeScript**, improving deployment efficiency and ensuring seamless project management for distributed engineering teams.
- ▶ Collaborated with cross-functional teams to drive innovation in proprietary **AI-driven tools**, offering technical strategies to improve workflow efficiency for large-scale development teams.
- ▶ Documented and communicated best practices for maximizing **code clarity, maintainability**, and system efficiency, contributing to knowledge-sharing and engineering excellence company-wide.
- ▶ Mentored junior engineers in developing and debugging skills, fostering growth in **collaborative remote environments** while improving team results in AI-driven initiatives.

HEWLETT PACKARD ENTERPRISE (HPE)

Mar 2014 – Apr 2017

Software Engineer

- ▶ Developed **scalable solutions for hybrid IT systems** by utilizing coding expertise across **C++**, **Python**, and cloud-based tools to enable effective infrastructure modernization.
- ▶ Contributed to **feature development** for data storage and **enterprise AI solutions**, improving product adaptability and aligning with client-specific needs for real-world applications.

- ▶ Engaged in **system architecture reviews and optimizations**, recommending technical enhancements to improve system performance and **scalability** in large-scale enterprise deployments.
- ▶ Provided domain expertise in **debugging software issues**, driving quality outcomes by reducing downtime for mission-critical applications with data structure analysis and **performance tuning**.
- ▶ Collaborated on cross-disciplinary projects with global teams, ensuring that development aligned with cybersecurity, networking, and **AI system objectives**.
- ▶ Mentored junior engineers in operational best practices and coding standards, promoting a culture of technical excellence in tackling **complex distributed codebases**.

EDUCATION

THE UNIVERSITY OF TEXAS AT AUSTIN

2009 - 2013

Bachelor's Degree in Computer Science
